Help COW *the Nazis!*

Milk...Meat...and Eggs...are just as vital as shells, ships, and planes. And when it comes to stepping-up production —whether it be milk or machine guns—modern methods are essential. The health and energy of your herd is of primary importance. And scientific nutrition is a big factor. Only a *complete, balanced* ration builds up the necessary resistance to disease and enables your cows to put every ounce of energy into the production of milk and butterfat for Uncle Sam. You can help your cows give "to the *last* drop" by balancing scarce grain with May Way Minn-A-Meal!
